

G.A.C.

PRECAMBRIAN DIVISION

Represent nearly 4 billion years of Earth history (\$10 a year, free for students)!

Rockin' Happy New Year!

In 2007, the G.A.C. Precambrian Division supported student attendance on the 'Transect through the southern Slave craton' field trip at the Yellowknife GAC-MAC meeting.

In 2008 we plan to support student members in Québec City (www.quebec2008.net) with their choice of either the pre-meeting, 2-day 'Working with migmatites' short course (CI4; full student fee covered) or the post-meeting Grenville Province field trip (EX5; 50% of cost covered). Up to six student members will be supported in order of registration date (please email Shoufa Lin shoufa@sciborg.uwaterloo.ca with your proof of registration).

At this time we welcome

- **nominations for the 2008-2009 Howard Street Robinson Lecturer (<http://www.gac.ca/activities/tours/HSRtour.php>)**
- **any ideas, comments and suggestions from our membership to unite earth system scientists from across the country, cratons, terranes and plates.**

Thank you for your continued support of the G.A.C. Precambrian Division. Have a great year, and see you all in Québec City in May!

Chair person: Christian Böhm, Manitoba Geological Survey

Secretary Treasurer: Shoufa Lin, University of Waterloo
Communications + Editor: Tim Corkery, Manitoba Geological Survey

Counselors: John Percival, Geological Survey of Canada
Normand Goulet, Université du Québec a Montréal
David Corrigan, Geological Survey of Canada
Ken Ashton, Saskatchewan Geological Survey
